

THE GREEN PARTY

Together We Can Make a Safe & Sustainable World

Always Growing
We are the only Party in the US which is increasing it's membership- by 22% last year.

The World's First Global Political Party

90 countries have an active Green Party. Germany's pro-inspections foreign minister is a Green.

Winning Elections
We have 176 elected Greens in 24 States including mayors, supervisors and members of the Legislature.

Some of the things we stand for:

Free Education From kindergarten through university. Spend more on schools now - spend less on prisons and welfare later.

Tax Breaks For working people not billionaires & bureaucracies

National Health Care Why are we the only developed nation that does not provide free health care for all its citizens?

Publicly Funded Elections To get corporate money out of politics (This is one big reason that we don't have free health care!)

Energy Independence To reduce the need to go to war for oil, stop global warming, and create a renewable energy economy .

Compassionate Communication Opening our hearts, listening to people's real needs, and believing that humanity can evolve to meet the challenges of our new century.

Why Wait? Register Green Today!

Send a message 24 hours a day, 7 days a week

that these are the values and policies you want to see in politics
