

Credit Cards and the Great Recession

Stop using credit cards with major banks (or non-profits using major banks), because they provide power to bankers who are destroying the international economy. Use cards from credit unions or community banks.

The finance industry in the US now "earns" a third of US domestic corporate profits, thanks to legislation underreported by the mainstream media. Use credit unions or community banks to minimize your contributions to that.

Financial Industry Profits as % of US Domestic Corporate Profit
