YOU AND EVERYONE YOU KNOW CAN BE THE CHANGE YOU WISH TO SEE! HERE'S HOW:

- Lead by example: Ride a bike, ride the metro, consume less and live more!
- Register Green Party and vote for candidates that reflect environmental values.
- Become a Locavore—eat locally grown foods, shop at farmers' markets and support local business. For more info go to: locavores.com.
- Purchase organic goods and take them home in your nifty reusable cloth bag.
- It's an oldy but a goody: Reduce, Reuse, Recycle everything you can. To find a recycling station near you go to: <http://earth911.org/>.
- Beware of Greenwashing: The actions of a corporation, government, or organization which advertises positive environmental practices while acting in the opposite way.
- Teach the Adults—many adults today don't know as much about the environment as young adults do. As you learn, teach your parents and everyone around you.
- Contact your elected representatives (city, state, national) and tell them you support stricter emissions standards, more money for public transportation, signing the Kyoto Protocol, etc.
- Encourage your school officials to pursue environmentally-friendly policies (e.g. buses that run on cleaner fuels)
- Create student groups on your campus and educate your peers about environmental issues. Contact campusgreens.org

What else can you do? Find your local Green Party affiliate and get involved!

Go to: <http://www.cagreens.org/> and find your local chapter!
